8.4 Risk assessment

Policy statement

We believe that the health and safety of children is of paramount importance. We make our setting a safe and healthy place for children, parents, staff and volunteers by assessing and minimising the hazards and risks to enable the children to thrive in a healthy and safe environment.
The law does not require that all risk is eliminated, but that 'reasonable precaution' is taken. This is particularly important when balancing the need for children to be able to take appropriate risks through physically challenging play. Children need the opportunity to work out what is not safe and what they should do when faced with a risk.

Procedures

- All staff undertake training and have adequate knowledge in health and safety matters.
- Our risk assessment process covers adults and children and includes:
  - determining where it is helpful to make some written risk assessments in relation to specific issues, to inform staff practice, and to demonstrate how we are managing risks if asked by parents and/or carers and inspectors;
  - checking for and noting hazards and risks indoors and outside, in relation to our premises and activities;
  - assessing the level of risk and who might be affected;
  - deciding which areas need attention; and
  - developing an action plan that specifies the action required, the time-scales for action, the person responsible for the action and any funding required.
- We have a written risk assessment for the setting which is checked daily before the session begins.
- The caretaker carries out checks, such as electricity and gas safety checks, and any necessary work to the setting premises are carried out annually and records are kept.
- Our manager ensures that staff members carry out risk assessments that include relevant aspects of fire safety, food safety and for all areas of the premises.
- Our manager ensures that staff members assess the risk for work practices including:
  - changing children;
  - preparation and serving of food/drink for children;
  - children with allergies;
  - cooking activities with children;
  - Specific activities that are considered 'risky play' such as woodworking (written consent is sought form parents in these cases).
  - supervising outdoor play and indoor/outdoor climbing equipment;
  - assessment, use and storage of equipment for disabled children;
  - the use and storage of substances which may be hazardous to health, such as cleaning chemicals;
  - visitors to the setting who bring equipment or animals as part of children's learning experiences;

This list is not exhaustive.
